Hello, we made this document to help clarify some questions that appear on the Export Control Form and seem to cause confusion. Please review below and let us know if you have any other questions not addressed here.

**Home institution:** The university or place of employment the applicant is currently attending/employed by.

**Financial Sponsor:** The person who will be sponsoring the applicant’s visa.

**Access to Technology or Technical Data:** It's not simple use of computers or electronics here; this question is asking whether s/he will have access to the controlled technology behind the item. See the definitions for technology and tech data on the last page.

**Encryption Source Code:** Will the applicant be provided with any restricted encryption code, either by a funding agency or collaborators?

**Service agreements:** Will the applicant be working on any projects for private or commercial entities in the course of their work for UAF?
